

The ACCESS/CAWCR October Informal Workshop to Discuss UM AMIP Simulations

Second Announcement

Bureau of Meteorology, 6th Floor Conference Room,

30th October

Who Should Attend?

Anyone interested in:

1. Assessing the performance of the local version of the UM for AMIP style simulations.
2. Influencing the plans for future UM AMIP model simulations.
3. Using data from UM AMIP simulations.
4. Running their own UM AMIP simulations.

What to do if you want to attend?

Please email me (l.rikus@bom.gov.au) and let me know you want to attend so that I can book the best room. If you would like to present something also let me know. If you have thoughts about the types of AMIP simulations we should be running or a need for additional output fields please bring them along!

Aims of the Workshop

- 1) To promote the use of the data from the recent (Martin Dix) and future AMIP UM simulations.
- 2) Establish communication between CAWCR and prospective users of the UM and AMIP data.
- 3) Disseminate preliminary and planned results from studies of AMIP UM simulations.
- 4) To promote sharing of data from UM AMIP simulations over as wide a range of participants as possible.
- 5) Survey the range of relevant interests and possible collaborative projects in the research community.
- 6) Establish a plan for future research for UM AMIP simulations.

Suggested Format

In keeping with the desired informality the workshop will focus on a number of broad themes with a number of short presentations to frame and seed subsequent discussion. A provisional programme is attached to this announcement.
